Bursa Malaysia's Centralised Sustainability Intelligence Solution

22 October 2025

CSI SOLUTION: Bursa Malaysia's designated sustainability reporting channel for PLCs

CSI Solution

Centralised Sustainability Intelligence

Sustainability Reporting Platform

- ISSB reporting & other climate reporting
- GHG emissions calculator (Scope 1 & 2)
- Metrics and performance targets (*coming soon*)

CSI Scope 3 & Supplier Engagement Solution

Targeted approach to support sustainability integration in supply chains

- Scope 3 calculator
- Supplier engagement & management
- Guided supplier engagement journey

Sustainability Financing Solutions

- Financing programmes for your suppliers from our bank partners

CSI Value-Added Services

Digital services offered by CSI partners to help corporates streamline disclosures and reduce reporting costs

IFRS S1 & S2 Gap Analysis Report

- AI-enhanced gap analysis of the corporate's alignment to IFRS S1 and S2

AI-Sustainability Reporting

- Generates a base sustainability report that complies with regulatory requirements and industry standards.

AI-Sustainability Rating Analyser

- Provides diagnostics to help PLCs enhance their sustainability performance and ratings.

CSI Platform – *Measure*

MEASURE - GHG Emissions Calculator

The carbon accounting tool allows a corporate to input and manage data effortlessly in one place and get comparative analytics year over year.

What is it? & use cases

Corporates get a comprehensive understanding of Scope 1, 2 and 3 emissions, which helps to identify emissions hotspots across scopes.

- Monitor Scope 1,2,3 emissions aligned to the GHGP
- Corporates annual sustainability reporting
- Identify emissions hotspots across scopes

Main features

- Scope 1 calculator (DEFRA EF)
- Scope 2 calculator (Suruhanjaya Tenaga & Enerdata EF)
- Scope 3 calculator based on a spend methodology (Fair Supply)***

***Accessible as part of the Supplier Engagement Solution

CSI Platform – *Manage* (1/2)

MANAGE – Supplier Management & Engagement Tool

The supplier engagement tool allow corporate to analyse Scope 3 emissions and engage with suppliers with the highest carbon footprint and work with them to gather additional data, set targets and monitor progress.

What is it? & use cases

Provides a visual representation of emissions hotspots across your supply chain and the ability to engage with suppliers to collect reported data.

- Procurement teams running supplier engagement programs
- Corporates looking to collect reported data from supply chains to increase the quality of their scope 3 assessment
- Financing opportunities for suppliers who make progress

Main features

- Uses supplier estimated emissions to show biggest impact on your business
- Create a custom supplier engagement programme and engage directly through the tool
- Get reported data from suppliers to replace the estimated data from Fair Supply

CSI Platform – *Manage* (2/2)

MANAGE – Supplier's Sustainability Readiness

The ESG Maturity Assessment is a self-evaluation tool designed to help suppliers understand their current ESG maturity level. The resulting report offers tailored access to sustainability learning courses, enabling them to build knowledge and effectively prepare for ESG disclosures to corporates.

Main features

- Suppliers to gain insights into their own maturity level and knowledge in sustainability
- ESG capacity building and training courses tailored for SMEs based on their level of readiness supporting their readiness to provide ESG disclosures to corporates
- Track your suppliers' progress and completion

Foundational	Intermediate	Advanced
 Understanding Sustainability	 Introduction to Sustainability Reporting	 Understanding Circular Economy
 Understanding GHG Emissions	 Introduction to Sustainable Supply Chain	 Understanding Sustainable Finance
 Introduction to Human Rights	 Overview of Occupational Safety and Health	
 Foundations of Integrity
